

Lab Task:	11
------------------	----

Course Code:	CL2005
---------------------	--------

Course Title:	Database Systems - Lab
----------------------	------------------------

Semester:	Spring 2026
------------------	-------------

Instructor:	Muhammad Mehdi
--------------------	----------------

Email:	muhammad.mehdi@nu.edu.pk
---------------	--------------------------

Guidelines

- Please review the lab manual before starting the task to ensure you fully understand the requirements.
- You may use **only the concepts covered in the lab manual** to complete this task.
- Your submission must be a **single PDF file** that includes:
 - The source code (in plain text)
 - Screenshots of the corresponding outputs
- Name your file using the following format: **rollno_name_labtasknumber.pdf**
Example: *24p-1234_ozair_labtask11.pdf*
- Unethical use of AI tools will result in a **deduction of 5 marks**.
- Late submissions will incur a penalty of **-1 mark per day**.

Tasks

You are provided with a SQL script file named *lab-11-bank.sql*, which contains SQL statements to create and populate a simplified banking database along with predefined views.

Execute the given script file in MySQL server using the **source** command to load the dataset. After successfully setting up the database, perform the following operations:

1. Perform a money transfer of 1000 from account 101 to account 102 using a transaction.

Ensure:

- Deduct from sender
 - Add to receiver
 - Insert a transaction record
 - Commit the transaction
2. Simulate a failure during a transfer of 2000 from account 102 to account 103 and use **ROLLBACK** to undo all changes.
 3. Perform a transaction with **SAVEPOINT**:

- Transfer 500 from account 101 to 103
 - Create **SAVEPOINT** after deduction
 - Then rollback only the credit operation using **ROLLBACK TO**
 - Commit remaining changes
4. Create a new user bank_clerk with a custom password who can:
- **SELECT** and **INSERT** on transaction_summary view only
 - Cannot access base tables directly
5. Grant a manager user bank_manager full privileges on the entire database including:
- **SELECT, INSERT, UPDATE, DELETE, CREATE VIEW**
 - Display privileges of this user.
6. Revoke **INSERT** privilege from bank_clerk and verify the updated permissions.
