

Lab Task:	15
------------------	----

Course Code:	CL2005
---------------------	--------

Course Title:	Database Systems - Lab
----------------------	------------------------

Semester:	Spring 2026
------------------	-------------

Instructor:	Muhammad Mehdi
--------------------	----------------

Email:	muhammad.mehdi@nu.edu.pk
---------------	--------------------------

Guidelines

- Please review the lab manual before starting the task to ensure you fully understand the requirements.
- You may use **only the concepts covered in the lab manual** to complete this task.
- Your submission must be a **single PDF file** that includes:
 - The source code (in plain text)
 - Screenshots of the corresponding outputs
- Name your file using the following format: **rollno_name_labtasknumber.pdf**
Example: *24p-1234_ozair_labtask15.pdf*
- Unethical use of AI tools will result in a **deduction of 5 marks**.
- Late submissions will incur a penalty of **-1 mark per day**.

Tasks

You are provided with a JavaScript file named *lab-14_15-devs.js*, which contains MongoDB commands to create and populate two collections: *developers* and *projects*.

Execute/Import the given script file in MongoDB shell to load the dataset. After successfully setting up the database, perform the following tasks:

1. Add two new fields named *availability* and *last_updated* with suitable values to every document in the *developers* collection using a single update statement.
2. Delete all developers whose *current_project* field is missing or null and whose number of skills is less than or equal to 2.
3. Increment the experience of all developers from Pakistan by 2 years and multiply their current project budget by 1.1 (10% increase) where a current project exists.

4. Add "Git" to the skills array of all developers who have more than 5 years of experience and remove "HTML" from the skills array of developers whose experience is less than or equal to 2.
5. Delete all projects whose budget is less than 1000 or whose team size is equal to 1.
